PROFESSIONAL SUMMARY

Full Stack Developer with professional experience at RVJ Infotech and key contributions to Soulbol — a live production mental health platform. Proficient in Ruby on Rails, Python, REST & GraphQL APIs, PostgreSQL, and React. Proven in building secure auth systems, optimizing databases, and integrating third-party services in production environments.

TECHNICAL SKILLS

Backend: Ruby on Rails, Python, C#, REST APIs, GraphQL, Sidekiq, Active Job, Devise, JWT

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Stimulus.js

Databases: PostgreSQL, MySQL | **Tools:** Git, GitHub, OOP, MVC, Schema Design, RBAC

WORK EXPERIENCE

RVJ Infotech | Backend Developer (Full-Stack)

July 2025 – Present

- Built and maintained scalable RESTful APIs and GraphQL endpoints for web and mobile clients.
- Optimized PostgreSQL databases via schema design, migrations, and query tuning for production workloads.
- Implemented Sidekiq background jobs for notifications, report generation, and third-party data sync.
- Delivered responsive UI features using HTML, CSS, JavaScript, React, and Stimulus.js in cross-functional collaboration.

PROJECTS

Soulbol — Mental Health Platform [LIVE PRODUCTION] · Rails · PostgreSQL · GraphQL · REST · Sidekiq · JWT

- Contributed backend development to Soulbol — a live production mental health platform connecting users with qualified psychologists via real-time chat, session booking, wallet system, and mood tracking.
- Built JWT-secured role-based auth (Patient / Psychologist / Admin), GraphQL & REST APIs, and Sidekiq async jobs for session reminders and wallet notifications.

Live: soulbol.com | Available on Google Play Store

Apex Classes — Coaching Institute Website [LIVE] · React · JavaScript · CSS3 · Netlify

- Designed and deployed a fully responsive React SPA for a coaching institute covering courses, faculty, batches, and contact — live on Netlify.

Live: apxchirawa.netlify.app

College Event Management System · Rails · PostgreSQL · GraphQL · REST · Sidekiq · Devise

- Full-stack event platform with 3-tier RBAC (Student / Admin / Super Admin), REST & GraphQL APIs, and async notifications via Sidekiq.
